TRADESHOW EXPERTS

Gridline

The Gridline Display is a lightweight, portable and easy to set up exhibit that goes beyond the traditional look of a Pop-Up.

The system is made of aluminium extrusion and plastic conubes that connect together easily to create various shapes and styles that are not possible with the Pop-Up frame. The Gridline Display creates a seamless graphic look using either full color graphic or fabric panels.

It is very easy to reconfigure the Gridline Display for a fresh look, different dimensions, or new use.
