CANTORQUE

Our Octanorm 10 display creates a unique look with a small footprint and full mural graphic panels, and packages into a two-case shipping solution.

For over 40 years Octanorm has been on the forefront of display innovation. It is the most widely used system in the world; available in over 70 countries.

Octanorm displays provide the look of a custom exhibit without the timeline for production and cost. It allows multiple configurations based on your changing exhibit size and needs.

We can customize with fabric graphics, laminate finishes, monitors, backlighting, slatwall or gridwall, weight bearing counters and locking storage.

41 CBG

Octanorm is ideal for other environments, including office spaces. This example features fabric panels, perforated metal panels, literature holders, a custom shelf and swivel monitor.

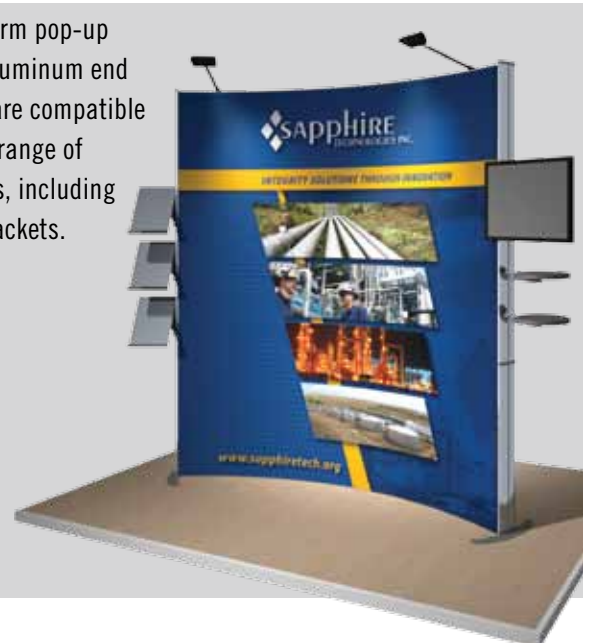

ECCO CHIPS

With a 5' center and 2' wing fabric panels, this example packages into one wheeled shipping case, with the monitor and custom Plexiglas cylinders packaging neatly into a second case.

SAPPHIRE TECHNOLOGIES

The Octanorm pop-up includes aluminum end caps that are compatible with a full range of accessories, including monitor brackets.

Octanorm Exhibits

JADE STONE

A 10' x 20' version of our Octanorm 10 system, this example features a customized central shelving area with reinforced beams to support a variety of stone samples. It was designed with a 10' x 10' space in mind so the client can take a section of the display to smaller events.

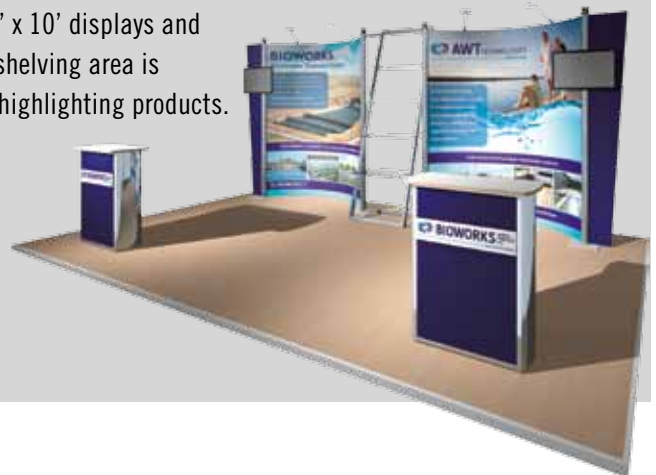

HYLOK

This example features custom pedestals to display products and curved graphics to add interest to the overall look. With full graphics, a custom curved reception counter and frosted Plexiglas finish, this display is sure to stand out on the show floor.

AWT TECHNOLOGIES

This 10' x 20' display converts easily into two 10' x 10' displays and the centre shelving area is perfect for highlighting products.

DYNAMIC VISION

This 10' x 20' with side wall is perfect for a corner booth space. The curved header brings corporate identity to the front of the booth and provides a greeting area to bring clients in towards the 80" projection screen.

Octanorm Exhibits

NAVNET

This example can be used in a 20' x 20' space, or a 10' x 20' by removing the ceiling. There is a storage area behind the display and an oversized counter and six monitors.

SUN MEDIA

In a 35' wide booth space this cityscape backwall with fabric graphics and simple hardware is bold and eye-catching while being easy to set up and take down.

WESTECH

This 20' x 20' example features a 12' tall central tower and four distinct wings to highlight the four key company values.

EXPRO

With a 16' tall backlit logo tower, this example makes the most of the 20' x 20' booth space height allowance and ensures the brand is visible and prominent from anywhere on the show floor. Featuring fabric ceilings, this display achieves the comfort of an enclosed space while leaving the floor space very open and inviting.
