That Lite Thing

LITE KIT #1

This 10' x 10' display includes 8' tall backwall, (2) lights, shipping case and full graphic coverage.

That Lite Thing is a complete exhibit system that provides a unique look for your display. We apply our high-quality, scuff-resistant graphics to Lite's panels, which are connected together using a tool-free circular plastic node. You'll spend less time and money on setup costs because it's so easy to put together. And because we're the only dealer in Western Canada you can be sure that your display will stand out from the crowd on the show floor.

Manufactured in Europe, Lite is extremely lightweight and durable. Packed into space-efficient aluminum crates, this system provides a substantial reduction in shipping costs.
